

COMPACTION RANGE

PH

Tamping rammers

The PH range offers the user manageable, reliable, and easily transportable tamping rammers.

- The PH rammers range offers different models between 65 and 80kg
- Different diesel and petrol engines
- Dimensions : 770x398x1038 mm / Foot dimensions: 332x280 mm
- Number of hits per minute: 650 v.p.m.
- Optional air filter saturation sensor
- Compatible with the TrackPro bluetooth device and My ENAR App
- Large 3-stage air filter

+ Air filter

PH rammers have a 3-stage filter that progressively retains particles according to their size.

+ Noise reduction

The fuel tank, located on the handlebar, serves as a barrier, such as acoustic shielding, to reduce the noise that reaches the user.

+ Economic maintenance

Designed for low maintenance cost with cost-controlled wear items.

+ Comfortable

Compensated and balanced jump for a more comfortable use of the machine by the user.
